Profile

An enthusiastic IT undergraduate seeking a Software Engineer Intern role, with a strong interest in full-stack web development. Familiar with React, JavaScript, and backend technologies, and eager to learn industry best practices while building real-world software solutions.

Education

B.Sc. (Hons) in Information Technology and Management **2023 - Present**
University of Moratuwa – Faculty of Information Technology

Projects

EVELORA - Recruitment Hiring Management System [\[GitHub\]](#)
Second Year Software Group Project / Mentored by Bistec Global

Role - Fullstack Developer, UI/UX Designer

Tech Stack – PostgreSQL, React, ASP.NET, Tailwind CSS, JWT, Azure Database

- Developed a Recruitment Hiring Management System to streamline the hiring process, enabling candidates to apply for vacancies and management to efficiently handle recruitment activities.

Smart Planetarium Booking & Experience Platform [\[GitHub\]](#)
(Ongoing Individual Project)

Role - Fullstack Developer, UI/UX Designer

Tech Stack – PostgreSQL, React, Spring Boot, Tailwind CSS, JWT

- Developed a Smart Planetarium Booking & Experience Platform to digitize ticketing and enhance visitor engagement through online bookings, interactive seat selection, and community features.

Automobile Service Appointment & Time Tracking System [\[GitHub\]](#)
(Group Project)

Role - Fullstack Developer, UI/UX Designer

Tech Stack – React, Spring Boot, PostgreSQL, Docker, Redis, RabbitMQ, WebSockets, JWT

- Developed an automobile service management system enabling customers to book services and track progress in real time, while allowing employees to manage appointments, log work hours, and receive notifications.

Hotel Booking & Management System

[\[GitHub\]](#)

Role - Fullstack Developer, UI/UX Designer

Tech Stack – ASP.NET Core MVC, REST APIs, SQL Server, Azure Database, XML, In-Memory Storage

- Designed and developed a single-user hotel booking web application with CRUD operations for bookings, rooms, and requests, along with weekly reporting and forecasting features.

Laptop Marketplace Platform – Multi-Vendor Tech Marketplace

[\[GitHub\]](#)

Role - Fullstack Developer, UI/UX Designer

Tech Stack – MongoDB, React, Node.js, Express, Tailwind CSS, JWT, Cloudinary

- Developed a multi-vendor laptop marketplace with role-based access, centralized shop/product management, advanced search & filters, and modern dark-themed UI/UX.

Technical Skills

- **Programming Languages** – Java, C#, Python, C, Typescript
- **Development Tools & Platforms** – IntelliJ IDEA, Postman, Git, GitHub, Docker, DockerHub
- **Databases** – MySQL, PostgreSQL, MongoDB
- **Frameworks & Libraries** - Spring Boot, ASP.NET Core, React, Next.js, Tailwind CSS
- **Design & Prototyping Tools** – Figma, Canva, GIMP

Extracurricular

IEEE Women in Engineering (WIE) Affinity Group – University of Moratuwa

- Chief Organizer (2025/26 Term)
- Director of Program & Event Coordination (2024/25 Term)
- Co-Chair – Futuro 3.0 Event (2025)

SEDS Mora – University of Moratuwa

- UI Designer of IT and Satellite division (2025 - Present)

Certificates and Other Education Qualifications

- **Web design for beginners course:** Open Learning Platform, UOM
- **Front-End Web Development course:** Open Learning Platform, UOM
- **Certificate in Spoken English for Professional Excellence:** Aquinas College of Higher Studies

Achievements & Participation

- **MoraXtreme 9.0** – Participation 2024
- **Innovate with Ballerina Coding Challenge** – Participation 2024

Non Technical Skills

- | | | |
|--------------|-------------------|---------------------|
| • Leadership | • Time Management | • Flexibility |
| • Teamwork | • Adaptability | • Positive Attitude |
